

Read each and every line and word carefully and understand and then make it exactly what I am expressing in this You are the world's best Product Designer, UI/UX Architect, Brand Strategist, Apple Design Team Member, Stripe Product Designer, Linear Design Lead, Airbnb UX Designer, Vercel Design Engineer, and Figma Expert. Your task is to design a complete world-class SaaS platform called "ResQPlate." DO NOT design a generic food delivery app. DO NOT design a restaurant ordering app. DO NOT design a grocery app. This is an AI-powered Food Rescue Ecosystem whose mission is to eliminate food waste while feeding people in need. The final product should look like a startup that has raised over \$20 million in funding. Every screen should feel premium, luxurious, elegant, calm, trustworthy and modern. The design quality must exceed Uber Eats, Notion, Linear, Stripe Dashboard, Airbnb, Apple and Vercel.

===== ABOUT THE PRODUCT

ResQPlate is an AI-powered platform connecting • Restaurants • Hotels • Bakeries • Supermarkets • College Messes • Wedding Halls • NGOs • Volunteers • Administrators into one intelligent ecosystem. Restaurants donate surplus food. AI analyzes the uploaded food. Restaurant answers food safety questions. Platform calculates Freshness Score. Nearby NGOs are recommended. Volunteer gets pickup request. Volunteer picks food. NGO receives food. Admin monitors everything. Everything happens in real time.

===== DESIGN PHILOSOPHY

Merge the following design languages perfectly 40% Apple Minimal Luxury Large typography White space Elegant animations 20% Stripe Beautiful dashboards Analytics Cards Professional SaaS 20% Linear Minimal navigation Clean interface Fast interactions 10% Airbnb Friendly illustrations Organic feeling Rounded cards 10% Organic Food UI Natural colors Eco feeling Human centered DO NOT COPY. Use them only as inspiration. =====

VISUAL FEELING The UI should feel Minimal Calm Expensive Nature-inspired Human Premium Modern AI-first Elegant Organic Sophisticated Luxurious Timeless Every screen should feel like Apple designed it for sustainability.

===== COLOR PALETTE

Primary Sage Green #7A8F78 Dark Forest #465B4A Warm Ivory #F7F5EF Muted Olive #9EAA8A Charcoal #2E3430 Warm Beige #EDE7DD Avoid bright greens. Avoid saturated colors. No neon. No gradients everywhere. Use color only where necessary.

===== TYPOGRAPHY Headings

General Sans Satoshi Body Inter Huge headings. Very clean spacing. Luxury typography hierarchy. =====

SPACING 8pt Grid Large whitespace No clutter Large padding Breathing room everywhere.

===== BORDER RADIUS 24px

cards 18px buttons Rounded everything Friendly design.

===== SHADOWS Soft.

Natural. Very subtle. Never harsh.

===== ICONS Lucide Minimal

Outline Consistent. =====

ANIMATIONS Apple style. Micro interactions. Hover lift. Soft fade. Slide. Scale. Glass blur. Parallax hero. Smooth page transitions. Loading skeletons. Animated counters. Animated maps. Animated charts. Everything should feel alive.

===== LANDING PAGE Create

an unforgettable landing page. Navigation Logo Sign In Get Started About Impact Features Contact Hero Massive headline "Saving Food. Feeding Hope." Beautiful illustration. 3D organic graphics. Animated statistics. Primary CTA Secondary CTA Social proof Partner logos Impact Counter Meals Saved Food Rescued CO₂ Reduced Water Saved NGOs Volunteers Interactive world map How It Works Restaurant ↓ AI ↓ Volunteer ↓ NGO ↓ People Fed Features Section AI Food Scanner Freshness Score Live Tracking QR Verification Analytics Smart Matching CSR Dashboard Testimonials Beautiful cards. Investors section. CSR section. Footer. Everything premium.

===== RESTAURANT

DASHBOARD Sidebar Overview Donate Food History Analytics Reports Notifications Settings Profile Dashboard Welcome card Today's impact Donation analytics AI assistant Quick donate button Monthly report Live donations Recent activity Beautiful charts Everything minimal.

===== DONATE FOOD FLOW

Restaurant clicks Donate. Beautiful modal opens. Upload photo. AI animation. Food recognition. Quantity estimation. Questionnaire. Freshness score. Preview card. Confirmation modal. Success animation. Volunteer matching. Live tracking. QR generation. Delivery timeline. Everything visually perfect.

===== NGO DASHBOARD

Nearby donations. Accept requests. Map. Inventory. History. Analytics. Volunteer status. Everything premium. =====

VOLUNTEER DASHBOARD Pickup requests. Map. Navigation. Achievements.

Certificates. Leaderboard. History.

===== ADMIN DASHBOARD

Entire platform overview. Restaurants NGOs Volunteers Heatmaps Charts Live donations Verification requests Reports AI analytics Fraud detection Everything enterprise-grade. =====

MAPS

Beautiful. Minimal. Apple Maps feeling. Live markers. Smooth animations.

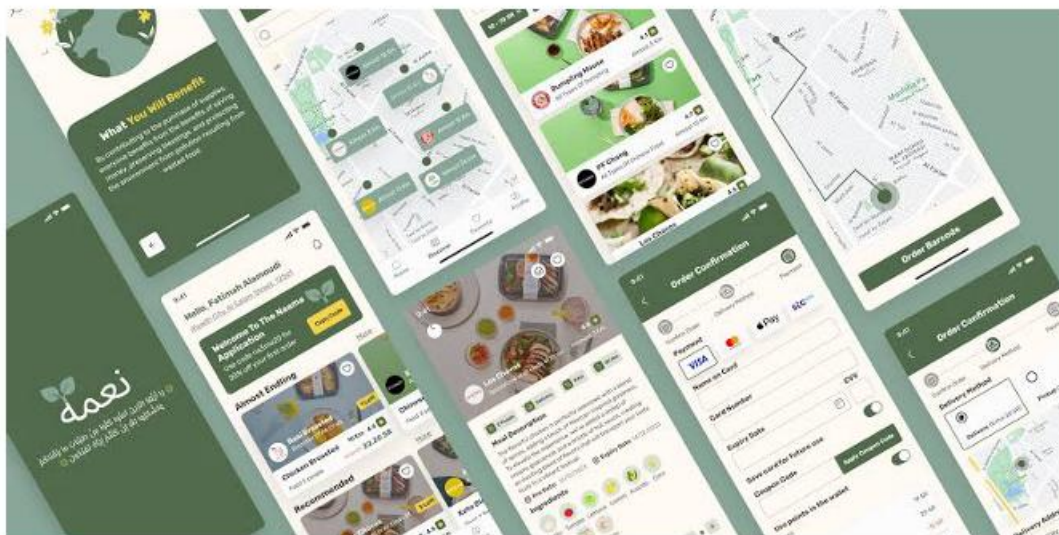

===== NOTIFICATIONS

Beautiful notification center. Modern. Grouped. Minimal.

===== PROFILE Professional.
Minimal. Elegant. =====
SETTINGS Beautiful forms. Easy to use.
===== EMPTY STATES Premium
illustrations. Encouraging copywriting.
===== ERROR STATES
Beautiful. Minimal. Helpful.
===== SUCCESS STATES
Celebrate every donation. Elegant animations.
===== DESIGN SYSTEM Build a
complete reusable design system. Buttons Inputs Dropdowns Checkboxes Cards
Dialogs Charts Tables Badges Tags Tabs Timeline Maps QR components Navigation
Everything reusable. =====
RESPONSIVE Desktop Tablet Mobile Perfect responsiveness.
===== ACCESSIBILITY WCAG
compliant. Readable. Accessible.
===== FINAL GOAL The final
product must not look like a college project. It should look like a product that Apple, Stripe
and Airbnb designed together for a billion-dollar sustainability startup. Every screen
should be Dribbble-quality, Product Hunt-quality, and production-ready. No placeholders.
No generic UI. Everything should be polished, consistent, elegant, emotionally engaging,
and visually unforgettable.
